About ORIC Pharmaceuticals

ORIC Pharmaceuticals is a privately held, clinical-stage oncology company focused on making cancer treatments more effective by addressing mechanisms of resistance. ORIC's lead asset, ORIC-101, is a potent and selective small molecule antagonist of the glucocorticoid receptor. ORIC's pipeline also includes an orally-available small molecule inhibitor of CD73, as well as other undisclosed programs targeting mechanisms of oncology therapy resistance. ORIC's scientific founders are Charles Sawyers, MD, and Scott Lowe, PhD, who have strong records of discovering novel targets in cancer that have led to innovative treatments. The company has assembled strong leadership and scientific teams and a board with extensive experience in drug development and financing. ORIC is funded by leading biotechnology investors, including [The Column Group](#), [Topspin Partners](#), [OrbiMed](#), [EcoR1](#), Fidelity, [Foresite and others](#). ORIC is headquartered in South San Francisco, California.
